An ISO 9001:2015 Certified Co.

VIGUNI is a brand owned by NV Infotech Domain Pvt. Ltd. The brand was created 3 years back to produce and market superior quality household products under CPG category at pocket friendly price.

We are a manufacturer based in Noida (UP), having regd. office at New Delhi (India), catering to retail civil markets on PAN India basis. We also have a large market of Govt. supplies for our products like floor wipers, kitchen wiper, spin mops, dry mops, clip mops, cloth clips, chopping board, floor duster (pochha), grass brooms, scrubbers etc. We are a dynamic company witnessing frequent product launches, market expansion and maintaining a positive growth.

The tag line of our brand, "Bringing Kwality to Lifel" was envisioned looking at the huge gap of quality products available at reasonable price in these product categories. All our product packaging carry the caption "उम्मीद से जादा..!" meaning the consumer gets more than his expectation (value for money).

Our brand VIGUNI has been registered under the Trade Marks Act, Govt. of India. The company is also registered as a Type-A manufacturer by Ministry of MSME, Govt. of India along with having ISO 9001:2015 certification. All our products carry 13 digit EAN code (Barcodes) as provided by GSI India and required by any organized trade. Each barcode is readable by Smart Consumer mobile app powered by Department of Consumer Affairs, Government of India, for viewing & verifying product details.

For retail segment, we have a growing distribution network of SS/Distributors/Dealers catering to the demands of FMCG sector like General Stores, Grocery Markets & Kirana Shops across India. With a lot of experience in catering to bulk requirements we can increase our scales of operation to fulfill market demands.

Our products are packed in export standard carton boxes and are strapped and stretch wrapped in order to minimize loss in transit due to mishandling, breakage or poor conditions at warehouses. These carton boxes can be stacked vertically thereby minimizing floor space required for storage.

NV INFOTECH DOMAIN PVT. LTD. has been promoted and managed by its directors Nipun Gupta & Vipul Gupta. Both directors are post graduates having degrees in MBA (marketing) from Amity University. The company has a healthy combination of techno-commercial directors where Vipul Gupta takes care of product development and manufacturing processes while Nipun Gupta has skills for market development and sales strategies. The financial aspects of running the company are taken care of by both directors.

We look forward to collaborate with established distributors/wholesalers/dealers in FMCG and household plastic segments to promote and market these products and fill the gap in this segment. Distributors and Wholesalers with ready infrastructure to supply products in their area can become part of our mutual growth plans.

We have a vision of having a PAN India presence for our products and building a brand known for quality products in its category. We also look forward to acquiring some shelf space under the Modern Trade segment for CPG and also supplying these products to govt. institutions and departments through tenders and registrations in future.

We believe in organized way of working and treat our buyers and suppliers as growth partners and having an environment of win-win for all stake holders.
